Questionnaire for Aligning Expectations in New Mentoring Relationships

Mentor / Supervisor:	Mentee / Student:	
Time Period:	Dept / Program:	

Read each pair of statements and estimate your position on each. For example with statement 1, if you believe strongly that the ideal mentoring relationship focuses on the research interests, you would circle "1" or "2". But if you think that the ideal relationship focuses on the working and communication styles, you would circle "3" or "4".

The M	Mentoring Relationship					
111017	For an ideal mentoring relationship, it's					For an ideal mentoring relationships, it's
1	important for both mentor and mentee to	1	2	3	4	important for both to have similar working
have similar research interests		•	_	,	'	and communication styles
	Mentors should only accept mentees when					Mentors should feel free to accept mentees

Using the "Questionnaire for Aligning Expectations in New Mentoring Relationships"

The Role of Expectations

Aligning expectations and goals is a constant theme in the literature on mentoring relationships and supervision. The expectations do not need to be identical for both sides (and would be unrealistic), but a thorough discussion of expectations can greatly increase the likelihood of a productive collaboration and minimize conflicts. Relevant expectations in the context of research mentoring and supervision can relate to:

- understandings of what research is
- appropriate roles of mentors and mentees, supervisors and employees, etc
- what is professional behavior and how respect is expressed to the mentor and mentee
- the likely consequences of asking questions or acknowledging problems
- how both the mentor and mentee can be pro-active and actively listen to each other
- and many other issues.

Mismatches of expectations are a constant theme in the literature on supervision and mentoring. To help bring some of these differences in expectations into the open for discussion, a possible strategy is using this questionnaire. This tool has been designed as a discussion starter for use by supervisors and students.

Our experience suggests that the tool is especially effective when users of this form recognize that

- there are no "right" answers to the items on the questionnaire
- responses are likely to be different at different stages of academic or professional progress
- even identical numerical responses can correspond to different thoughts and expectations
- the purposes of using this form are:
 - to structure a fruitful discussion about the reasons why different responses may have been selected,
 and
 - o to decide on appropriate ongoing actions for the current participants and stage

Suggestions for Use

We suggest the following process for using this form.

- o make sure both parties have a blank copy of the questionnaire
- o both parties fill out the questionnaire separately
- o set up a meeting that will be focused on this questionnaire
- o at the meeting, start by comparing the responses given for each statement by each person
- o discuss thoroughly the significance of each response (i.e. answer what each response means for each person)
- provide suggestions on how you'll address different responses and expectations
- o consider repeating the process at various points (e.g. once per year, during critical transitions of the mentee's academic timeline, etc)
